

Family Home Visiting Programs Appreciation Week

Photo credit: Indigenous Visioning

In honor of the Inaugural **Family Home Visiting Appreciation Week, April 21-25**, we celebrate the difference Home Visitors are making in the state of Minnesota.

Home Visitors support families and young children in profound ways from:

- stabilizing supports to families and young children
- fostering healthy parent/child connections
- connecting and supporting families to community resources
- focusing on the basics and provide predictability (in visits, in support, in education)

Home visitors make a powerful impact by supporting families and helping children thrive! Their work leads to better school performance, stronger attendance, and healthier, happier lives for kids. This Family Home Visiting Appreciation Week, we proudly join maternal and child health advocates nationwide in celebrating and honoring the incredible dedication of Home Visitors!

Thank you for all you do!
